

## CRISTA ASHBY

### MANUFACTURING GRADUATE 2016

Full Time Role:  
Associate Operations  
Support

### Rotations

1. Manufacturing
2. Operational Readiness
3. Operational Excellence

### Highlight: Manufacturing: Cell Culture

Production Operator, Filling Reject Analysis, Audit Actions, Production Recipe Control

My graduate journey started in one of our cell culture production facilities. This introductory rotation aligned really well with my honours experience which was heavily involved in cell culture however the production scale at CSL was definitely a shock. I was able to spend majority of my time as a production operator in upstream (cell culture) and downstream (purification) manufacturing along with numerous side projects related to audit findings and training management.
