

## SHOHINI SHOME

### MANUFACTURING GRADUATE 2016

Full Time Role:  
Project Engineer

### Rotations

1. Manufacturing
2. Manufacturing
3. Major Projects
4. Utilities Engineering

### Highlight: Major Projects

Procurement and Installation of Equipment, Shutdown Preparation and Co-ordination, Commissioning/Qualification of Powder Conveying System.

Eager to learn how Engineering support the Manufacturing group, I requested a rotation working on the production expansion of one of our intravenous immunoglobulin therapies. During this rotation, I commissioned and qualified lump-breakers, diverter valves, powder receivers on tanks and new pipeline installation for powder conveying. I liaised heavily with a Powder Specialist from Switzerland for procurement and installation activities and co-ordinated cross-functional teams to conduct Factory Acceptance Testing for the software that automates the conveying system.
